

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### **Usage guidelines**

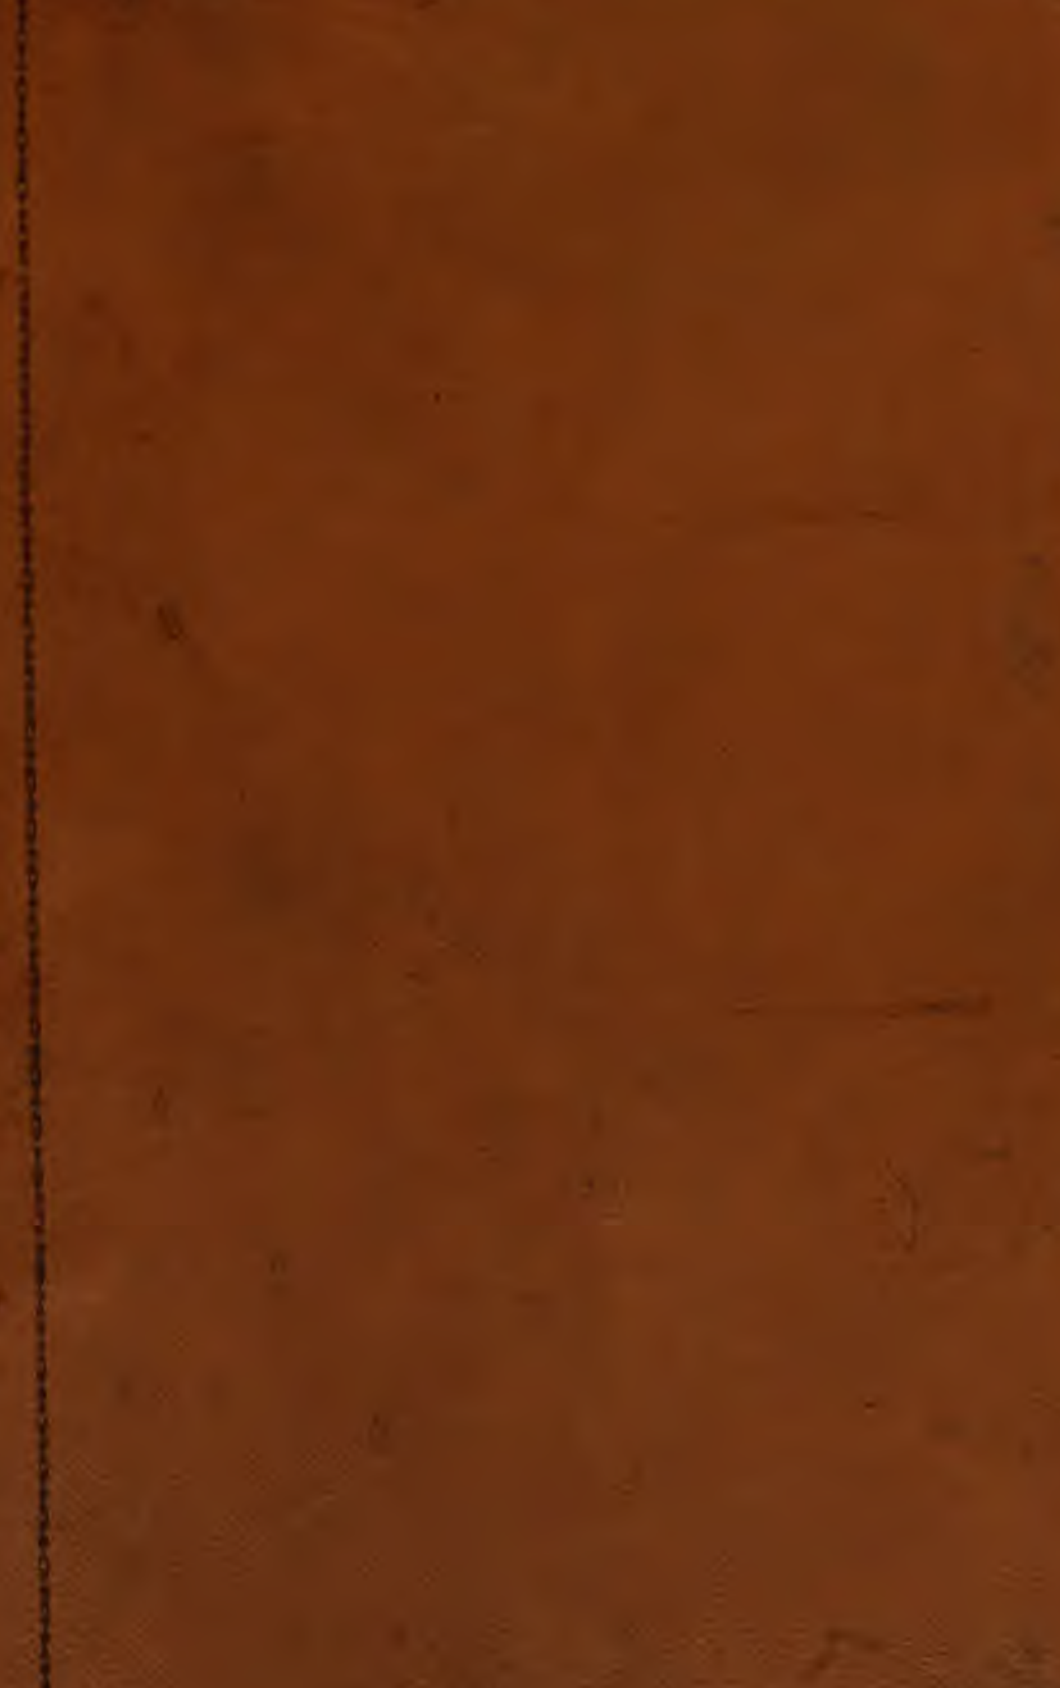

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### **About Google Book Search**

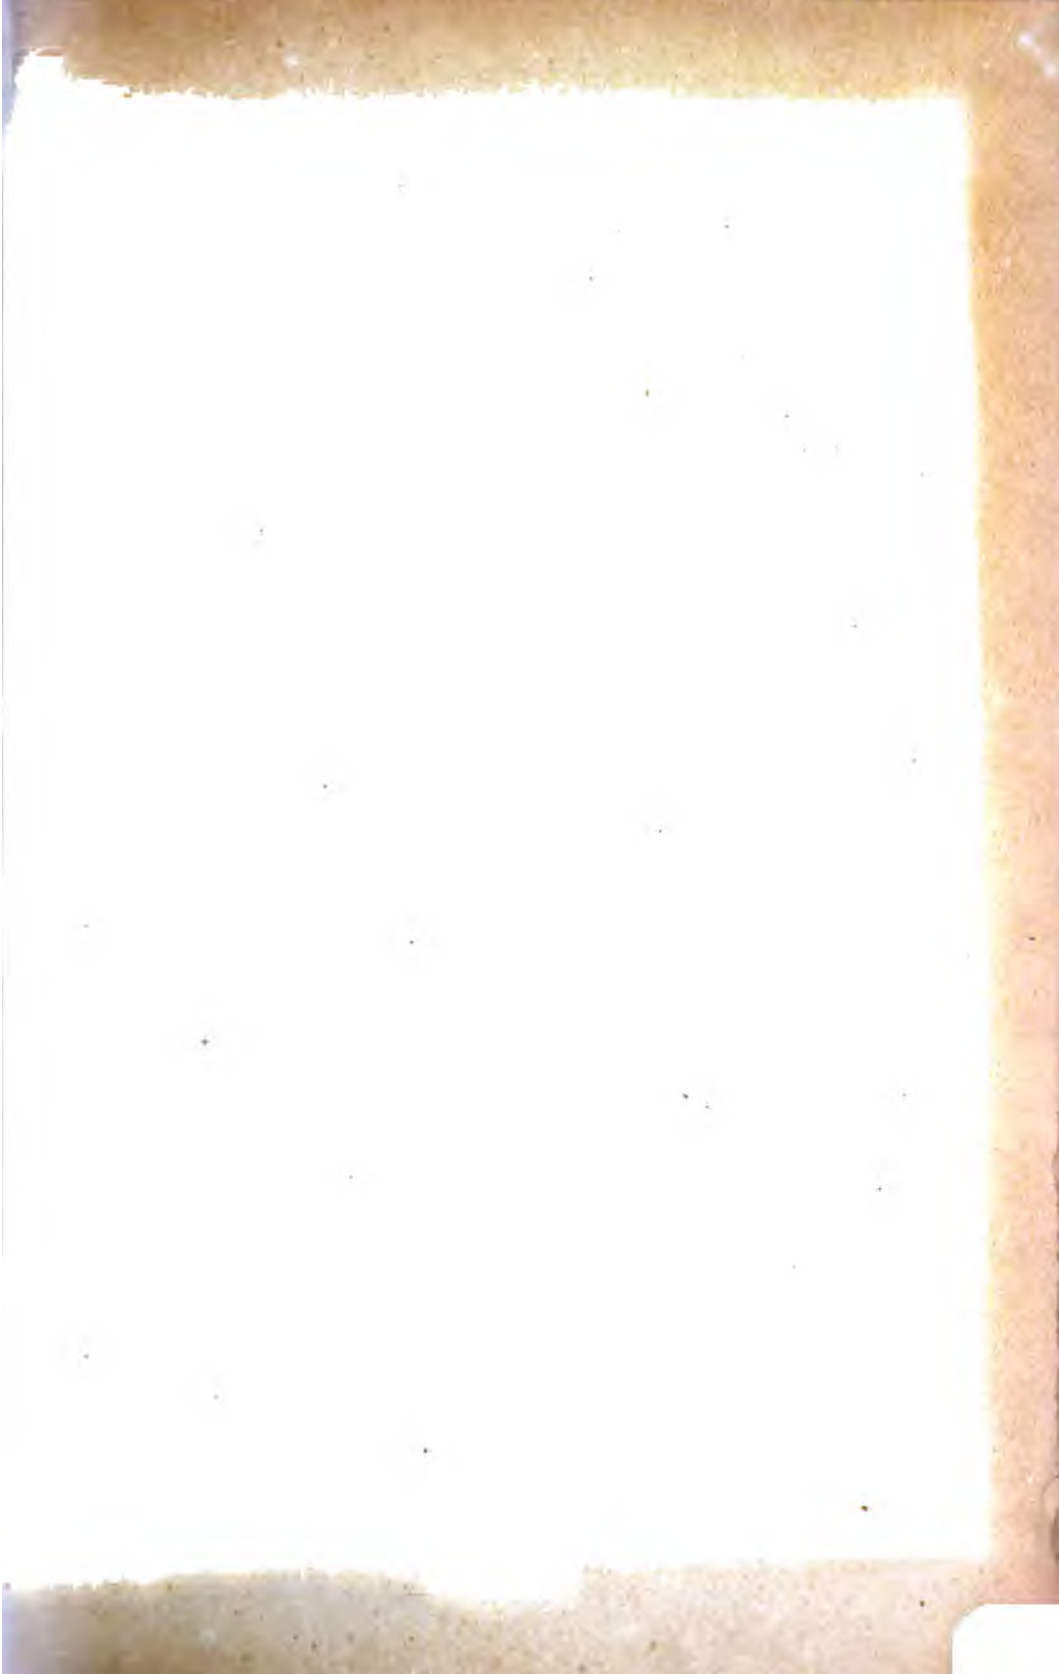

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

WASHINGTON:  
GOVERNMENT PRINTING OFFICE.  
1885.

TREASURY DEPARTMENT,  
BUREAU OF STATISTICS,  
*Washington, D. C. December 1, 1885.*

SIR: I have the honor to transmit herewith, in accordance with requirements of section 336 of the Revised Statutes, complete statements in regard to the foreign commerce, navigation, immigration, and tonnage entered and cleared in the foreign trade of the United States, compiled from the returns made to this office by collectors of customs, for the year ending June 30, 1885.

The tables contained in section IV, Merchant Tonnage of the United States, have been prepared in the office of the Commissioner of Navigation of this Department and are published in the Report on Commerce and Navigation by the direction of the Secretary of the Treasury.

The tables found in this report have been compiled and published fully one month earlier than during any other year since the organization of the Bureau.

WM. F. SWITZLER,  
*Chief of Bureau.*

Hon. DANIEL MANNING,  
*Secretary of the Treasury.*

## EXPLANATIONS OF TABLES IN SECTION I.

The *statements of general imports*, Tables 3, 4, and 5, embrace imported articles entered at the custom-houses for immediate consumption and imported articles entered for warehouse. The statements of *imports entered for consumption*, Tables 24 to 31, embrace imported articles entered for immediate consumption and imported articles withdrawn from warehouse for consumption. The statement of *general imports* and the statement of *imports entered for consumption* for any period will always differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "entry for consumption" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply, that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Portions of these goods are subsequently exported.

### OFFICIAL VALUES.

1. *Value of imports*: The values of imported articles in this report are those which they bore in the markets of the foreign countries from which they were imported. The act of March 3, 1883, excluded from the dutiable value the following costs and charges, which prior to that act had formed a part of the dutiable value of imports, viz:

"The cost of transportation, shipment, and transshipment, with all the expenses included, from the place of growth, production, or manufacture, whether by land or water, to the vessel in which shipment is made to the United States; the value of the usual and necessary sacks, crates, boxes, or covering of any kind in which such merchandise is contained; commission at the usual rates, but in no case less than 2½ per centum, and brokerage, export duty, and all other actual or usual charges for putting up, preparing, and packing for transportation or shipment."

Under this system of valuation, the value of imported commodities landed on our wharves is less than their actual cost or value to the importer by the amount of the above costs and charges, and the cost of freight on the goods from the last foreign port whence they were shipped to the United States. The item of freight from the last foreign port of shipment to the United States, however, has never been included in the dutiable value. The difference in methods of valuation of imports should be considered in any comparison made between the official values of imports of merchandise for years prior to July 1, 1883, and for years subsequent to that date.

The values shown in the statements both of *general imports* and of *imports entered for consumption* are mainly unappraised values; that is, values as shown by the invoices prior to liquidation of entries.

2. *Foreign export values*: Tables 13 to 17, sometimes called "foreign exports," or "re-exports," exhibit exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is the value which they bore in the foreign markets whence they were imported into the United States—in other words, their import value (see *value of imports*, above). The value of such commodities exported "not from warehouse" (that is, goods not under bond), comprising free goods mainly, is the value at the ports of the United States whence they are exported.

3. *Domestic export values*: Tables 8 to 12, inclusive, exhibit the exports of articles of purely domestic product or manufacture; also, exports of commodities of foreign origin which have been changed from the form in which they were imported, or enhanced in value by manufacture in the United States; such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles and utensils made from imported metals, &c. The value of exports of domestic merchandise is their market value at the time of exportation in the ports of the United States whence they are exported to foreign countries.

4. *Value of foreign merchandise in transit or transshipped*: Tables 18 and 19 exhibit foreign merchandise brought to the United States for immediate transit across the territory of the United States to a foreign country, or for transshipment in the ports of the United States to a foreign country. The value of commodities as shown in these tables is their value in the foreign markets whence they were brought to the United States, their official value being similar to that of imports.

5. *Value of warehoused merchandise*: Tables 21, 22, and 23 exhibit warehoused imported merchandise which has already appeared in the statements of general imports, Tables 3, 4, and 5 for the year during which it was imported. The official values of the articles therein represented are the same as the import values above described.

#### DEFECTS IN EXPORTS.

6. The statistics of exports of domestic commodities to Mexico and to Canada by land are defective, owing to the fact that there is no law requiring railway companies to furnish to collectors of customs statistics of domestic merchandise transported over their roads to these foreign countries. It is estimated that our exports to the Dominion of Canada during the year ending June 30, 1885, as contained herein, are deficient to the amount of from \$22,000,000 to \$25,000,000. No official returns of imports into Mexico from the United States can be obtained for a recent year upon which to base a reliable estimate as to the deficiency in value of our official returns of exports to Mexico.

## CLASSIFICATION OF ARTICLES IMPORTED AND EXPORTED.

7. In Table 5 will be found the classification of articles of general imports; and in Tables 10 and 15 the classification of domestic and foreign articles exported. The imports and exports of articles by countries and by customs districts are not shown more fully than is represented by schedules, Tables 5, 10, and 15. Table 24 exhibits the classification of *imports entered for consumption*, which imports are not compiled and published by countries.

8. The word *ton*, wherever used in these tables, indicates the long ton of 2,240 pounds, and the hundred-weight represents 112 pounds.

## CLASSIFICATION OF COUNTRIES FOR IMPORTS AND EXPORTS.

9. The following schedule exhibits the countries or groups of countries represented in the tables of imports and exports by countries:

# REPORT

OF

## THE CHIEF OF THE BUREAU OF STATISTICS

IN REGARD TO

### THE FOREIGN COMMERCE OF THE UNITED STATES.

TREASURY DEPARTMENT,  
*Bureau of Statistics, November 5, 1885.*

SIR: I have the honor to submit to you the following report in regard to the foreign Commerce of the United States for the year ending June 30, 1885.

The value of the foreign commerce of the United States during the years ending June 30, 1885 and 1884, was as follows:

	1885.	1884.
<b>MERCHANDISE.</b>		
	<i>Dollars.</i>	<i>Dollars.</i>
Exports of Domestic merchandise.....	726,682,946	724,964,852
Exports of foreign merchandise.....	15,506,809	15,548,757
<b>Total exports.....</b>	<b>742,189,755</b>	<b>740,513,609</b>
Imports of merchandise.....	577,527,329	667,697,698
Intransit and transshipment trade.....	68,871,076	78,628,734
<b>Total exports, imports, and intransit.....</b>	<b>1,388,588,165</b>	<b>1,491,840,086</b>
<b>GOLD AND SILVER.</b>		
Exports of gold.....	8,477,892	41,081,957
Exports of silver.....	33,753,633	26,051,426
<b>Total exports.....</b>	<b>42,231,525</b>	<b>67,133,383</b>
Imports of gold.....	26,691,696	22,831,317
Imports of silver.....	16,550,627	14,594,945
<b>Total imports.....</b>	<b>43,242,323</b>	<b>37,426,262</b>

From this comparison it will be seen that the total value of the foreign commerce in merchandise, including the intransit and transshipment trade, for the year ending June 30, 1885, was \$93,251,921 less than

during the preceding year. This decrease in the value of our commerce was owing to the decrease of \$90,170,364 in the value of our imports, the largest falling off which has occurred in the imports during any year since 1862. The articles, the importation of which largely declined during the last fiscal year, are enumerated on pages 30 and 33.

The exports of gold during the last fiscal year were \$32,604,065 less than during the fiscal year 1884, and of silver \$7,702,207 more than during the fiscal year 1884. During the year ending June 30, 1885, the value of exports of merchandise was \$164,662,426 in excess of the value of imports, and the imports of specie \$1,010,798 in excess of the exports. It will thus be seen that the most marked changes in the foreign commerce of the country during the last fiscal year consist of the remarkable decrease in the value of the imports of merchandise before mentioned, and the marked decline in the outflow of gold.

THE DECREASE OF IMPORTS AND THE DECLINE OF PRICES.

The decrease in the value of imports has resulted from the general depression in trade and the consequent decline in prices; but there has not been so marked a decline in the volume of business as in its value. The prices of domestic commodities having shared in the general decline, and the value of the exports of such commodities during the last fiscal year having increased, would indicate a considerable increase in our products of agriculture and of manufacture..

The decline in prices of some of the leading domestic commodities is shown in the following table, exhibiting the annual average currency prices in New York of the articles named during each year from 1847 to 1884, inclusive :

The following table however affords, it is believed, a more accurate view of the cost of commodities to consumers, inasmuch as it represents approximately the value per unit of quantity of the entire amount of each commodity named, exported during the year, while the average prices in the foregoing table may be, in some cases, made up from quotations of prices at which there were little or no sales. The difference in the price of cotton, however, as shown by the two tables, is not material.

The following table shows the annual average export price in currency of the articles of domestic product named, and for the years indicated:

Year ending June 30—	Indian corn per bushel	Wheat per bushel.	Wheat flour per barrel.	Cotton per pound.*	Leather per pound.	Mineral oils, refined, per gallon.	Bacon, hams, per pound.	Lard per pound. From these tables it will be seen that the general course of prices has been downward—falling during periods of commercial depression, and rising during periods of great commercial and industrial activity, but never reaching the plane of the inflated prices of the decade prior to 1875.

#### EXPORTS AND IMPORTS, 1835-1885.

\* Nine months, from September 30, 1842, to June 30, 1843.

Although our imports and exports of merchandise have declined in value from \$1,547,020,316 in 1883, its highest point, to \$1,319,717,084 in 1885, a falling off of 14.7 per cent., as the result of the protracted period of commercial depression, yet when we regard it in the light of its general progress since 1860, we find abundant reason for encouragement. During the period from 1860 to 1885, the total value of our imports and exports of merchandise increased from \$687,192,176 to \$1,319,717,084, or 92 per cent.; our imports of merchandise increased from \$353,616,119 to \$577,527,329, or 63 per cent.; and our exports of domestic merchandise increased from \$316,242,423 to \$726,682,946, or 129 per cent.

**THE FOREIGN COMMERCE OF THE UNITED STATES COMPARED WITH THAT OF OTHER COUNTRIES.**

When we compare the values of the foreign commerce of the leading commercial nations of the world, we find that the United Kingdom of Great Britain and Ireland stands first, Germany second, France third, and the United States fourth; also, that the value of the commerce of the United States increased since 1860 to a much larger extent than that of either the United Kingdom or of France, as will be seen by the following table, showing the values of imports and exports of merchandise into and from the United Kingdom, France, and the United States each year from 1860 to 1884, and the increase per cent. of the trade of each:

\* No data.

There being at hand no exact data showing the value of the imports and exports of Germany during the above period, a similar exhibit cannot be made as to the comparative progress of the foreign trade of that country. The total value of the imports and exports of that kingdom, however, during the year 1883 was \$2,450,428,745, which, as before stated, would place it second in rank among nations as to the value of its foreign commerce.

DOMESTIC EXPORTS.

The highest point to which the value of our exports of domestic merchandise has risen in the history of our foreign commerce, was during the year 1881, when it reached the sum of \$883,925,947. During the last fiscal year the value of such exports was \$726,682,946, a falling off since 1881 of \$157,243,001, or 17.8 per cent. This decrease in the value of our exports is attributable in great part to the decline in the value of the exports of cotton, breadstuffs, and provisions.

The exports of our domestic merchandise during the last fiscal year have been classified as follows:

Articles.	Values.	Per cent.
	<i>Dollars.</i>	
Products of agriculture.....	530, 172, 868	72. 86
Products of manufacture.....	117, 269, 810	16. 14

## THE LEADING ARTICLES OF DOMESTIC EXPORT.

Under fifteen heads, 91 per cent. of the exports of domestic merchandise during the last fiscal year can be grouped, giving in a short space a comprehensive and reasonably correct idea of the character of our export trade. The value of exports under these heads for the past two fiscal years was as follows:

*Exports of cotton.*

It will be seen by reference to the foregoing table that cotton continues to furnish the people of the United States the most valuable article of export. The total quantity of unmanufactured cotton exported during the last fiscal year was 1,891,659,472 pounds, valued at \$201,962,458, an increase of nearly \$5,000,000 as compared with the value of such exports during the year 1884. The exports of cotton during 1885 were 29,000,000 pounds in excess of the exports of the preceding year.

It is now nearly one hundred years—to be exact, ninety-four years—since the first shipment of cotton was made from South Carolina, the exports during the year 1791 being 189,316 pounds. Of the 5,700,000 bales of our crop of 1883-'84 Great Britain alone took 2,500,000 bales, and Lancashire, the great centre of the cotton manufactures in England, increases in population in the ratio of the increase of the cotton trade.

*Exports of breadstuffs.*

Next to cotton in value among our exports are breadstuffs, amounting during the last fiscal year to \$160,370,821. The value of exports of wheat in 1885 was nearly \$73,000,000, a decrease of over \$2,000,000 from the value of the exports of 1884. Where we realized \$75,000,000

for 70,000,000 bushels of wheat exported in 1884 we obtained less than \$73,000,000 for 84,500,000 bushels in 1885.

The value of exports of wheat flour during 1885 was \$52,000,000, an increase of about \$1,000,000 over the value of the exports of the preceding year. Wheat flour was affected by the same falling off in price which depressed the value of exported wheat; but the increase of nearly one hundred million bushels in the yield more than compensated the deficiency in value. The aggregate value of wheat and wheat flour exported during the last fiscal year was \$125,000,000, or something more than 60 per cent. of the value of cotton exported.

Corn is thought to encroach upon the prerogatives of cotton, and many of its friends have claimed that, estimating the various forms in which it enters our commercial products, it is king, instead of cotton. Without stopping to investigate the relative claims of corn and cotton to the mastery, it may be said with truth that the corn crop of last year was enormous. The amount sent abroad rose from 45,000,000 bushels in 1884 to nearly 52,000,000 bushels in 1885. The influence of the general run of low prices was felt in respect to this commodity, as is shown by the fact that an increase of nearly 7,000,000 bushels in the quantity exported, was able to effect an increase of only \$355,000 in the value. For the surplus corn exported \$28,000,000 were received.

#### *Exports of provisions.*

Third in order of value among our exports stand provisions, their value exported during the fiscal year 1885 amounting to \$107,332,456. The exports of bacon and hams, like those of wheat and wheat-flour, show a falling off in price, shipments of 400,000,000 pounds during 1885 bringing in \$37,000,000, while 389,000,000 pounds exported in 1884 brought in nearly \$40,000,000. The decline in prices was so marked that in spite of this increase of 10,500,000 pounds exported, there was a decrease of \$2,600,000 in the value.

#### *Exports of lard.*

The value of exports of lard during the last fiscal year was \$22,600,000, a decrease of \$2,700,000, as compared with the exports of 1884. We exported 18,000,000 pounds more lard in 1885 than in 1884.

#### *Exports of cattle and fresh beef.*

The cattle exported during the fiscal year 1884 numbered 190,518, as against 135,890 during the last fiscal year, a decrease of nearly 55,000 head. The value of exports of cattle fell from \$17,850,000 in 1884 to a little less than \$13,000,000 in 1885.

Our exports of fresh beef have declined both in quantity and value. The aggregate value of the fresh beef exported during the last fiscal

year was over \$11,000,000, a decrease of \$800,000 as compared with the exports of the preceding year.

*Exports of mineral oil.*

Fourth in value on the list of exports stands mineral oil, which in 1884 reached the immense amount of 513,660,092 gallons, valued at \$47,103,248, and in 1885, 573,668,180 gallons, valued at \$50,257,947, an increase of about \$3,000,000 over the value of the exports of the preceding year.

Notwithstanding Russian competition is seriously threatening the future of our petroleum trade, it is encouraging to note that, for the present, the American product holds its supremacy, and that in the extreme East our sales are increasing.

*Exports of leaf tobacco.*

The exports of leaf tobacco during the year 1885 show an increase in quantity of 27,000,000 pounds, the number of pounds for 1884 being 192,130,820, and for 1885, 219,221,207. The value of the exports of leaf tobacco in 1884 was over \$17,000,000, and in 1885 nearly \$22,000,000.

*Exports of sugar.*

The exports of refined sugar show a marked increase. In 1884 we exported 76,000,000 pounds, getting for it \$5,400,000. In 1885 we sent abroad 252,500,000 pounds, valued at \$16,000,000, an increase of 176,500,000 pounds over the exports of the preceding year. A rise of \$10,600,000 in the value of the exports of this product in a single year is worthy of note.

The exports of agricultural products and products of manufacture exhibit the magnitude and wonderful development of our resources. The relative growth of the exports of these great products also shows a remarkable uniformity of progress, the exports of manufactured products slightly taking the lead in rapidity of increase. Our exports of agricultural products rose from \$256,560,972 in value in 1860 to \$530,172,966 in value in 1885, an increase of 106 per cent., but the exports of manufactured products increased from \$45,658,873 in value in 1860 to \$117,259,810 in 1885, an increase of 157 per cent., both industries exhibiting gratifying evidences of progress and prosperity.

Our exports of products of mining consist largely of mineral-oil products, which are distributed more widely in our export trade among the nations of the globe than any other domestic product.

It will be observed by reference to the following table, that our exports of the products of agriculture have consisted almost entirely of raw cotton, breadstuffs, provisions, including meats and dairy products, and leaf-tobacco—these products during the fiscal year 1885 comprising 95 per cent. of the total value of the exports of all products of agriculture.

\* Live animals not separately stated.

The values of our products of agriculture exhibit a remarkable rate of increase, the exports of live animals for food leading in rapidity of growth, meat and dairy products being second, and breadstuffs third.

The following table shows the value of our exports of provisions, comprising meats and dairy products, and the growth of our export trade in the principal articles included therein, since 1860 :

Our export trade in hog products has been seriously injured by the exclusion of such products from the markets of Germany and France, but our exports of beef and dairy products, and of live animals for food, show a rapid and substantial progress.

INCREASE IN THE VALUE OF EXPORTS OF MANUFACTURED ARTICLES.

In connection with the above exhibit of the progress of our manufactured exports, on page 19, the following table illustrates the growth of the exports of leading articles of domestic manufacture since 1866. Among the exports of manufactured products which show the most rapid development are agricultural implements, clocks, watches, and parts of, manufactures of cotton, manufactures of iron and steel, including sewing-machines, machinery, hardware, tools, &c., the products of industries requiring a high degree of skill to manufacture so as to compete successfully in the markets of the world with the products of European nations.

The following table shows the values of the leading articles of domestic manufacture exported since 1866, and the year of the greatest and of the least export of such articles during the period:

XXXVIII FOREIGN COMMERCE OF THE UNITED STATES.

At this time, when strenuous efforts are being made to develop our export trade in manufactured articles in the markets of the West Indies, South and Central America, and Mexico, attention is directed to the fact that 43 per cent. in value of our manufactured products is exported to Europe, of which 27 per cent. are sent to Great Britain, and only 33 per cent. to the above-named countries of this continent; and it is suggested whether it might not be for our advantage not to neglect the cultivation of trade with wealthy and powerful nations in whose markets we have already gained a strong foothold.

In this connection is presented the following statistics in regard to our trade in merchandise with Central and South America, the West Indies, and Mexico during the years ending June 30, 1884, 1885:

IMPORTS OF MERCHANDISE.

The highest point to which the value of our imports attained was in the year 1882, when it reached the sum of \$724,639,574. During the last fiscal year the value of our imports amounted to \$577,527,329; a falling off from the imports of 1882 of \$147,112,245. This decline is attributable to the decrease in the imports of sugar and molasses, manufactures of silk, manufactures of iron and steel, tin and manufactures of, manufactures of wool and of cotton, hides, tea, india-rubber, fancy goods, furs.

Of the value of our imports of merchandise during the last fiscal year, 59.90 per cent. consisted of manufactured articles, valued at \$345,914,067; 40.10 per cent. of crude or partially manufactured articles, valued at \$231,613,262. There has been, since 1860, a very marked increase in the percentage of imports of crude or partially manufactured articles, and a marked decline in the percentage of imports of manufactured articles, indicating a steady growth in the demand for crude articles to be used as materials in the various processes of manufacture.

The value of our imports of merchandise during the last fiscal year, as compared with the imports of fiscal year 1884, shows a decline of \$90,170,364. This decline occurred mainly in the imports from the United Kingdom, Cuba, France, Brazil, &c. The decline in the imports from these countries, and the articles in which the falling off occurred, are exhibited in the table on page 30.

The imports of the principal and all other articles of merchandise into the United States are shown as follows for the year ending June 30, 1885:

**THE LEADING ARTICLES OF IMPORT.**

*Imports of sugar.*

Notwithstanding the proverbial enterprise and industry of our sugar planters, sugar is one of our leading imports, as is evidenced by the fact that for the year ending June 30, 1885, we paid over \$72,500,000 for our imported sugar, for which we obtained 2,717,884,653 pounds. Large as these figures appear, they are smaller than those of the preceding year, when our imports of sugar amounted to more than \$98,000,000. The difference in pounds is not so marked as the difference in price, though the falling off in quantity amounts to rather more than 38,000,000 pounds as against a decline nearly \$26,000,000 in the value.

*Imports of coffee.*

During the year 1885 we expended nearly \$47,000,000 for about 573,000,000 pounds of coffee. In 1884 our coffee bill was about \$50,000,000, we receiving therefor about 535,000,000 pounds, thus showing that the price per pound of coffee was less during the last year than during the preceding year. From this showing it would appear that coffee to the people of the United States is no longer a luxury but a necessary of life, and very generally used, while the people of Great Britain spend nearly four times as much for tea as for coffee. With us the proportions are reversed; \$14,000,000 was the sum we spent for tea last year, a sum representing 72,000,000 pounds.

*Miscellaneous imports.*

Tin plates cost us more than \$16,600,000 to import during the last fiscal year, and more than \$18,000,000 the year before.

The amount paid for dress-goods as a matter of course is large. Silks show a decided falling off as compared with 1884, but the account is still heavy, amounting, in 1885, to \$14,651,000 for dress and piece goods, as against \$18,858,000 the year before, and \$12,000,000 for laces, ribbons, and other forms of manufactured silk, as against \$17,000,000 for similar articles during the previous year. Silk unmanufactured about held its own, a little less than \$12,500,000 being the price of raw silk as reeled from the cocoon.

Where we imported clothing, combing, and carpet wools to the value of \$12,000,000 in 1884, we expended nearly \$9,000,000 in 1885. Woolen cloths for men's clothing were imported to the amount of \$10,000,000 in 1885, instead of \$13,000,000 in 1884. Dress goods for women's and children's wear cost \$13,460,000 in 1885, as against nearly \$14,000,000 in 1884. It should be remembered, however, that the difference in value is not in all cases a fair measure of the volume of trade. Cotton embroideries, laces, insertings, trimmings, and lace window curtains make an important element in the aggregate, footing up \$10,125,000 during the past year, an increase of \$100,000 over the year before. Linens, brown or bleached, ducks, diapers, crash, handkerchiefs, &c., were imported to the value of \$11,500,000, as against \$12,700,000 the year before.

Among the minor imports, it is noticeable that bananas are coming more and more into favor. Notwithstanding the depression of trade in other directions, we paid during the fiscal year 1885 \$275,000 more for our supply of this fruit than during the preceding year. Other fruits have ranked as luxuries and have suffered from the depression of trade, while perhaps the banana is saved by its value as a cheap and wholesome fruit. The sums we paid for figs, lemons, oranges, prunes, raisins, and nuts declined during the year 1885.

Our importations of books show a falling off of about half a million dollars, dropping from \$3,600,000 in 1884 to \$3,000,000 in 1885.

Among the eccentricities of our imports may be noted—that dutiable art-works, embracing paintings and statuary, show an advance of about \$500,000, rising from about \$830,000 in 1884 to \$1,383,000 in 1885.

For opium, crude and prepared for smoking, the outlay in 1884 was about \$862,000. In 1885 it ran up to \$1,318,271. The small amount imported in 1884 was owing to the stocking of the market in 1883, in anticipation of the change in rate of duty, which was increased by act of March 3, 1883, from \$6 to \$10 per pound.

1885.....	345, 914, 067	59. 90	231, 613, 262	40. 10	577, 527, 329

There has been since 1860 a very marked decline in the percentage of manufactured articles imported, and an increase in the percentage of crude or partially-manufactured articles imported, indicating a steady growth in the demand for crude articles to be used as materials in the various processes of home manufactures.

## IMPORTS ENTERED FOR CONSUMPTION\* AND DUTIES COLLECTED THEREON.

The following table shows the value of imported merchandise entered for immediate consumption, including withdrawals from warehouses for consumption, and the duties collected thereon during the last fiscal year:

\* The general statement of imports embraces entries of imported articles made at the custom-houses for immediate consumption and entries for warehouse. The statement of imports for consumption embraces the entries of such articles for immediate consumption and withdrawals from warehouse for consumption. The general statement of imports and the statement of imports entered for consumption for any period will always differ to the extent that the value of entries for warehouse for the period differs from the value of withdrawals from warehouse for consumption. The term "entered for consumption" is the technical name of the entry of imports made in the custom-house, and does not imply that the goods were actually consumed, but simply that they are delivered into the custody of the importer, and that the duties have been paid on the dutiable portion. Portions of these goods may be subsequently exported.

The increase in the annual average ad valorem rate of duty on dutiable merchandise, from 41.702 per cent. in 1884 to 46.074 per cent. in 1885, has been caused mainly by the decline in the prices of goods subject to specific duties, upon which are imposed high rates of duty. Among others, the following are conspicuous examples of a marked decline in price without a corresponding falling off in the quantity imported :

Sugar, not above No. 13, Dutch standard, which declined in price from 3.46 cents per pound in 1884 to 2.5 cents per pound in 1885; molasses, which declined from 16.4 cents per gallon to 13.38 cents; clothing wools, from 22.7 cents per pound to 19.7 cents; carpet wools, from 12.43 cents per pound to 10.55 cents; glycerine, from 11.6 cents per pound to 6 cents, &c.

The values of the imports for consumption of these five commodities during 1885 were as follows :

Articles.	Quantities.	Values.
		<i>Dollars.</i>
Glycerine ..... pounds..	7, 573, 034	453, 930
Sugar, brown ..... do....	2, 548, 210, 538	64, 329, 170

Wool, carpet ..... do....	56, 339, 530	5, 947, 485
<b>Total</b> .....		<b>77, 174, 661</b>

The values of these articles, computed at the prices of such imports during 1884, would have appeared as follows :

The fall in price of these five articles caused a decrease in the value of imports of upwards of \$26,600,000 without causing a corresponding decrease of the duty collected, thus carrying the equivalent ad valorem rate considerably above that of the preceding year of higher prices.

**IMPORTS, AND DUTIES COLLECTED THEREON, FROM 1791 TO 1885.**

Prior to the year 1867 no separate account was kept of the quantity and value of each kind of imported commodities entered for consumption, nor of the respective amounts of duty collected thereon. The fol-

lowing table is therefore divided into two parts, the first of which shows for the years 1791 to 1866, inclusive, the value of the net imports of merchandise into the United States, the amount of duty collected thereon, and the average ad valorem rates of duty collected on dutiable goods, and on both free and dutiable goods imported; and the second of which shows for the years 1867 to 1884, inclusive, the value of merchandise entered for consumption free of duty and dutiable, the amount of duty collected, and the average ad valorem rate of duty collected on the total value of both free and dutiable goods entered for consumption :

THE CARRYING TRADE OF THE UNITED STATES.

The following table shows the value of our commerce during the last fiscal year, and the nationality and methods of transportation by which it was conducted.

Although the value of our foreign commerce has steadily increased, the value of the commerce carried in vessels bearing our national flag has as steadily decreased. Foreign vessels propelled by steam are rapidly monopolizing our carrying trade. In 1856 the value of our foreign commerce was \$641,000,000, of which 75 per cent. was carried in American vessels. During the last fiscal year the value of our foreign commerce was \$1,388,000,000, of which only 14.61 per cent. was carried in American ships. (See Table No. 15 of Appendix.)

From the following table it will be seen that, of the merchandise transported in our foreign trade, nearly 65 per cent. in value was carried in foreign steamers, and only 7 per cent. in American; also that nearly 72 per cent. was carried in steamers, and only 22 per cent. in sail vessels.

The value of merchandise transported in the carrying trade of the United States during the year ending June 30, 1885, is shown as follows:

† Owing to the absence of a law for the collection of statistics of immigration by railways, the Secretary of the Treasury, on account of their unreliability, discontinued their collection on July 1 last.

## DEFECTS IN STATISTICAL LAWS.

This Bureau, under my direction, is earnestly striving to collect as fully as possible the statistics of our foreign commerce, but the law under which it is operating was passed in 1821, when our foreign commerce in merchandise amounted to only \$109,017,157, and at a period anterior to the introduction of steam as a motive power for vessels or land vehicles. This law has remained on the statute books substantially as it was passed in 1821, when there was little or no traffic across our land frontiers, and provides no means by which collectors or other agents of the government, through whom our statistics are collected, can procure data in regard to—

(1) Exports of domestic commodities from the country by railway cars or other land vehicles.

(2) Of immigrants and passengers arriving in the country by railway cars or other land vehicles.

(3) Of emigrants and passengers leaving the country either by land conveyance or by water.

(4) Of the movement of commodities and vessels in our coastwise trade.

(5) Of the products of our marine fisheries brought into ports of the United States, except such products as are brought from the distant whale fisheries.

The law in question provides only the means of collecting the statistics of exports to foreign countries, in vessels, and a later enactment provides for the collection of statistics of immigrants arriving from foreign countries in vessels alone.

No statistics of exports by railways are now procured except from the officers of a few railway companies. The officers of companies of railroads leading into Mexico, and of several important routes leading into Canada, utterly refuse to give collectors of customs any data in regard to the exports over their roads, claiming that they are not required by law to do so.

Full and correct statistics of our trade with Canada and with Mexico are especially important at this time when our trade interests with those countries are the frequent subject of legislation, arbitration, or negotiation.

It is, therefore, my purpose to submit to you at an early day the draft of a bill for presentation to Congress providing for the more complete and accurate collection of the statistics of our foreign commerce, and for the inauguration of other reforms which, in my opinion, will be of advantage to the people and to Congress.

It affords me pleasure to add that, during my comparatively brief incumbency of this office, the clerks and employes of this bureau have rendered me most valuable and cordial co-operation in the effort to

attain greater promptitude in the publication of its reports, and to make them of greater usefulness to the country, and to those especially whose duty or inclination brings them face to face with the economic problems of the times.

Very respectfully,

WM. F. SWITZLER,  
*Chief of Bureau.*

HON. DANIEL MANNING,  
*Secretary of the Treasury.*

a Articles subject to a discriminating duty only are classed in the statements of imported merchandise under the head of "free of duty."  
 b These totals do not include the values—(1) of imported commodities withdrawn from warehouse and transferred to manufacturing warehouses; (2) of imported materials withdrawn from warehouse for consumption and used in the construction and equipment of vessels; (3) of imported salt withdrawn from warehouse for curing fish (see statements Nos. 25, 26, and 27). These amounts, aggregating \$224,439.00 for 1885, should be added to make the entire value of withdrawals from war-house for consumption.  
 c The average ad valorem rate of duty in this table is computed on the aggregate duty collected, including additional, discriminating, and penal duties.
